### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Lally on 17 March 2005.

The application has been amended as follows:

Cancel claims 8, 10-13, 17, and 22.

Replace claim 1 with:

A client device comprising processing means and storage, wherein the client device is suitable for connecting to a network and includes a client application configured to generate a client request, receive information from the network, and present the received information to a user as audio information; and

a server device connected to the network and configured to provide information to the client device responsive to the client request;

wherein the system is configured to determine when at least a portion of the information provided by the server is unsuitable for presentation to the user as audio information by the client and wherein the system is further configured to respond to the determination by storing the unsuitable portion of the information for subsequent access by the user;

Art Unit: 2173

wherein storing the information for later access by the user comprises assigning a dynamically generated URL to the stored information, creating a link indicating the dynamically generated URL, and emailing the link to the user.

Replace claim 18 with:

A computer program product residing on a computer useable medium for transferring information from a server to a client on a data processing network, comprising:

computer code means for determining when at least a portion of information requested by the client is unsuitable for presentation by the client; and

computer code means, responsive to determining that the requested information includes information unsuitable for audio presentation, for taking an action selected from the group consisting of storing the requested information for subsequent retrieval by the user and providing a visually enhanced version of the requested information to the user;

wherein the code means for storing the requested information comprises code means for dynamically generating a URL indicative of a storage location of the requested information, code means for creating a link indicating the dynamically generated URL, and code means for forwarding the link to the user.

Replace claim 23 with:

The computer program product of claim 18, wherein the code means for forwarding the link to the user comprises code means for sending the link to the user as an email message.

Art Unit: 2173

***Allowable Subject Matter***

Claims 1, 3-7, 9, 18, 19, 21, and 23-25 are allowed.

The following is an examiner's statement of reasons for allowance: In combination with the claimed subject matter, the prior art does not teach or fairly suggest assigning a dynamically generated URL to the stored information, creating a link indicating the dynamically generated URL, and forwarding the link to the user. The prior art of record only teaches storing information for subsequent access and emailing information to the user.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
